

1. Brainstorming and Ideation

Project: COMIC CRAFT – Interactive Comic Story Website

Project Vision

Comic Craft is a web-based comic story platform designed to present comic books and superhero stories in an attractive, interactive and easy-to-navigate format.

Problem Statement

Many comic story projects are presented as plain text or static pages. Users need a simple visual platform where stories, characters, chapters and comic panels can be explored comfortably.

Brainstorming Outcomes

S.No.	Item	Details
1	Project Name	Comic Craft
2	Core Idea	Interactive digital comic story website
3	Target Users	Students, comic readers and casual visitors
4	Main Content	Comic books, characters, chapters, story summaries and visual panels
5	Technology	HTML, CSS and JavaScript
6	Theme	Modern superhero/comic-book interface

Proposed Features

Home page, comic library, featured stories, character cards, chapter/story view, search/filter interface, responsive design and simple navigation.

Expected Result

A visually engaging front-end website that demonstrates how a traditional comic story can be organized as a digital web experience.
