

3. Project Design Phase

Project: COMIC CRAFT – Interactive Comic Story Website

System Architecture

The project follows a simple front-end architecture: Presentation Layer (HTML/CSS) → Interaction Layer (JavaScript) → Comic Content/Data embedded in the page or local assets.

Page Structure

S.No.	Item	Details
1	Header	Logo, navigation links and primary action
2	Hero Section	Project title, short introduction and call-to-action
3	Comic Library	Cards for available comic stories
4	Character Section	Character profiles and roles
5	Story Viewer	Selected story/chapter content
6	Footer	Project information and credits

UI Design Principles

Use a dark comic-inspired background, strong title typography, panel/card layouts, visual hierarchy, hover effects and responsive spacing.

Data Model

S.No.	Item	Details
1	Comic	id, title, category, description, image, chapters
2	Character	id, name, role, description, image
3	Chapter	id, comicId, title, summary, content

Navigation Flow

Home → Comic Library → Select Comic → View Story/Chapter → Return to Library.
