

5. Project Development Phase

Project: COMIC CRAFT – Interactive Comic Story Website

Implementation

The Comic Craft website is implemented as a client-side application using HTML5 for structure, CSS3 for visual design and JavaScript for search and story-viewer interactions.

Main Modules

S.No.	Item	Details
1	Home	Project introduction and navigation
2	Comic Library	Searchable comic cards
3	Characters	Character profile cards
4	Story Viewer	Interactive chapter/panel display
5	Responsive UI	Mobile-friendly grid and navigation

Development Files

S.No.	Item	Details
1	index.html	Main executable website page
2	COMIC_CRAFT_1.html	Submission copy of the website

Execution Steps

Open index.html in a modern browser. No server or external database is required for the basic demonstration.
