2.4 Environment & devices

Functional requirements

Browse library

Browse a library of 10 comic titles.

Live search

Search titles as you type.

Category filter

Filter: All, Marvel, Avengers, Heroes, Classics.

Detail pop-up

Open a detail pop-up for each title.

Favorites

Save favorites in the browser.

Newsletter

Newsletter sign-up with validation.

Non-functional requirements

Responsive

Responsive on desktop, tablet and phone

Themes

Dark and light theme

Performance

Fast: single file, no backend

Accessibility

Accessible labels and "/" search shortcut

Smooth feel

Smooth scrolling and reveal animations

Technology stack

HTML5

Semantic HTML sections give the page its structure.

CSS3

CSS variables drive the theme; breakpoints handle responsive layout.

Vanilla JavaScript

Search, filters, modal, favorites, theme toggle and animations.

Browser localStorage

Keeps saved favorites in the browser, with no backend.

Environment & devices

ENVIRONMENT

Everything runs in a browser. No backend, no installs.

Desktop

Layout adapts at the responsive breakpoints.

Tablet

Layout adapts at the responsive breakpoints.

Phone

Layout adapts at the responsive breakpoints.
